

PHYSICIANS BEHAVIORAL HOSPITAL

a path to a better quality of life

The information provided on this website is the retail published rates and is not what you will be charged. The actual charges will be lower than the retail published pricing on this website. If you have insurance or your covered by Medicaid/Medicare your benefits will ultimately determine the amount you owe (including deductibles, co-pays, co-insurance, and out-of-pocket maximums). These estimates do not include any physician charges. In addition to making available a list of standard charges (sometimes called a chargemaster) for all services provided at the facility, a 20% discounted cash price is offered to patients without insurance. Physicians Behavioral Hospital has provided pricing data for two services – an inpatient psychiatric hospitalization and outpatient psychiatric services. This information is current as of its posting and will be updated annually, as required.
